

CLAIMS

What Is Claimed Is:

1. A plant/dry gift assembly, comprising:

a dry assembly comprising a dry vessel defining a top opening and having non-perforated walls; and

a wet assembly comprising a wet vessel, said wet vessel inserted into said top opening.

2. The assembly of Claim 1, wherein said dry vessel further comprises a throat adjacent to said top opening, said wet vessel and said throat cooperatively arranged whereby said wet assembly is insertible into said throat.

3. The assembly of Claim 2, wherein said dry vessel is further defined by a dry chamber within which dry contents are retained.

4. The assembly of Claim 3, wherein said dry vessel is designed to prevent said wet vessel from being placed into said dry chamber.

5. The assembly of Claim 4, wherein said dry contents comprise candy.

6. The assembly of Claim 5, wherein said wet assembly further comprises an oasis block residing within said wet vessel.

7. The assembly of Claim 6, wherein said wet assembly further comprises a plurality of live plants inserted into said oasis block.

8. The assembly of Claim 3, wherein said dry contents comprise bath products.

9. The assembly of Claim 3, wherein said dry contents comprise at least one stuffed figurine.

- 10.** A combination flower arrangement and gift assembly, comprising:

 - a dry assembly comprising a dry vessel defining a top opening; and
 - a wet assembly comprising a wet vessel, said wet vessel configured to retain an arrangement of living plants and configured to cooperate with said dry assembly such that said wet vessel is insertible into said top opening.
- 11.** The combination of Claim 10, wherein said dry vessel further comprises a substantially clear vessel defined by a throat adjacent to said top opening, said wet vessel and said throat cooperatively arranged whereby said wet assembly is insertible into said throat.
- 12.** The combination of Claim 11, wherein said dry vessel is further defined by a dry chamber within which dry contents are retained.
- 13.** The combination of Claim 12, wherein said dry vessel is designed to prevent said wet vessel from being placed into said dry chamber.
- 14.** The combination of Claim 13, wherein said wet assembly further comprises an oasis block residing within said wet vessel, and said wet vessel is made from substantially clear material.
- 15.** The combination of Claim 14, wherein said wet assembly further comprises a plurality of live plants inserted into said oasis block.
- 16.** A method for assembling a plant/dry gift assembly comprising the steps of:

 - assembling a wet assembly defined by a wet vessel;
 - assembling a dry assembly defined by a dry vessel having a dry chamber within which dry contents are placed; and
 - inserting said wet assembly into said dry assembly.

17. The method of Claim 16, wherein said wet assembly assembling step comprises inserting an oasis block means into said wet vessel prior to said inserting said wet assembly into said dry assembly.

18. The method of Claim 17, wherein said wet assembly assembling step comprises inserting live plants into said oasis block means prior to said inserting said wet assembly into said dry assembly.
